

Vanished

Author: Meg Cabot

Series: 1-800-WHERE-R-YOU

This book compiles books one and two:

- When Lightning Strikes
- Code Name Cassandra

Jess Mastriani was walking home from school with her best friend Ruth when she got struck by lightning. Suddenly she had the power to find missing children and adults! She knows exactly where they are, always. Great power, right? Wrong! Not everyone she finds wants to be found. On top of that, her new found power may have landed her a job for the army! But what do they really want her to do? Can she fix her mistakes and escape from under the thumb of the government? Read the book to find out!

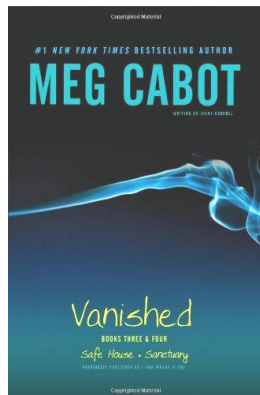

My favorite part of the book was when Jess argues with her 2 older brothers. They fight, but she still cares about them. I think this is something all siblings can relate to. It reminded me of when I argue with my brother.

I would recommend this book to anyone who loved the Hunger Games series. What genre would I put it in? I think it is not quite fantasy and not quite realistic fiction, but something in between. I recommend it to anyone who enjoys reading either genre.
