

Game Time

Flash Card Mania!

Ready

20 index cards

Stopwatch or clock with a second hand

Set

Write the following conversion problems on the fronts of the index cards, one per card. Write the answers on the backs of the cards.

28.1 g = ___ kg Answer: 0.0281 kg	330 m = ___ km Answer: 0.33 km	6.2 m = ___ cm Answer: 620 cm	27.3 mg = ___ g Answer: 0.0273 g	70 mm = ___ cm Answer: 7 cm
8 km = ___ m Answer: 8,000 m	6,200 cm = ___ m Answer: 62 m	105 mL = ___ L Answer: 0.105 L	3.37 g = ___ mg Answer: 3,370 mg	1,805 mg = ___ g Answer: 1.805 g

Go!

- 1 Set the timer for one minute and start it.
- 2 Have player 1 show player 2 the problem side of a card. Player 2 figures out the conversion. Player 1 continues to show player 2 new cards until the timer stops.
- 3 Record the number of problems player 2 answered correctly.
- 4 Switch roles. Reverse the order of the cards. Set the timer so player 1 has one minute to figure conversions. Record the number of problems player 1 answered correctly. The player with the most correct conversions is the winner.
- 5 Play the game again. This time make up your own problems!
