## Multiplication Movement

### Ready

**You will need:**

- a deck of cards
- paper and pencil
- 1 number cube

### Set

Remove the face cards and the jokers from the deck of cards. Shuffle the cards and deal each player 4 cards face down.

### Go!

- 1 Have players turn over their cards and form a number with the 4 cards.
- 2 Toss the number cube.
- 3 Multiply the number on the number cube by the number they created with the cards. Players compare their products. Each player may switch 2 cards in her or his number to try to make the product larger.
- 4 Re-multiply the new numbers with the same number tossed on the number cube. The player with the larger product wins.
