

# Game Time

## Race for Compatibility

### Ready

**You will need:**  
3 number cubes  
Paper and pencils

### Set

Give each player 3 number cubes.

### Go!

- 1 Toss a number cube. Write down the number. This number will be the divisor for the division problem.
- 2 Toss all 3 number cubes.
- 3 Form a 3-digit number from the numbers tossed, and write it down without letting the other player see it. This number will be the dividend for your division problem.
- 4 Uncover the number, then race to estimate the quotient of the numbers using compatible numbers. The first player to find a correct answer wins the round. The first player to win 5 rounds wins the game.
