

Game Time

What's Your Place?

Ready

You will need:

A deck of cards
9 index cards

Set

Remove all of the face cards and jokers from the deck of cards.
Shuffle the cards.

Write the following on the index cards, one place value on each card:

ones

tens

hundreds

thousands

ten thousands

hundred thousands

millions

ten millions

hundred millions

Shuffle the index cards and place them face down on the table.

Go!

- 1 Deal each player 9 cards. Without looking at them, players line up their cards face down in a horizontal line.
- 2 Have players turn over their cards, one by one, to form a 9-digit number. Players may not change the order of their cards.
- 3 Choose an index card randomly and turn it over. Compare the digits on the players' cards in the place value drawn. Award each player the number of points of that digit.
- 4 Add up the scores. The player with the largest number after 10 rounds is the winner!
